Banking
Pay bills, make deposits, and reconcile, all from the same window.

Sales
Quote to order to invoice, the sales command center covers the entire sales process.

Track and Bill Time
Use multiple billing rates, track chargeable and non-chargeable time, and bill in hours or units.

Contact Management
Track customer, employee and vendor information, and sync with Mac OS X Address Book.

Budgets and Reports
Intuitive budgeting allows you to plan next year's budget with over 200 available reports.

Inventory
Powerful options allow for total inventory control: multiple pricing levels, kit-building, and negative inventory.

Multi User Access
Network Edition, optimized to work over a Mac OS X network, is included in this box.

Mac

AccountEdge FOR Mac

Automate, organize, and process all your business tasks and financial information

Manager Range

Accounting software for any kind of business.

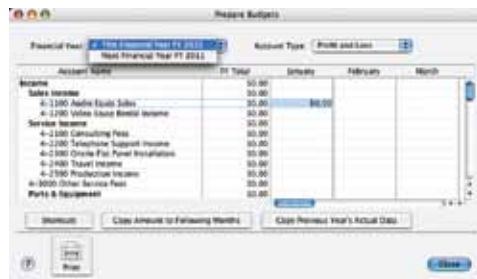

Easy to use – just like your Mac

You probably work with a Mac because it's easier to use and the interface just makes sense. Well, rest assured, you'll feel right at home with AccountEdge. Even if you're not a seasoned Mac user, you'll be able to navigate the software like a pro in no time. AccountEdge offers the most complete, easy to use accounting solution for Mac-based small businesses. With over 100 business templates to choose from and our Easy Setup Assistant to guide you along the way, you will be sending invoices and cutting cheques in no time

Find your profits on a sale, as you make it

Quickly learn the profitability of a sale with the Show Profit Analysis button. It shows gross profit, margin, and cost of each item you are selling and for the entire invoice. Change the price per unit to see how it affects your margin and profitability. You can show profit analysis from an order, quote, or an invoice

Budget for 2 years

Budgets can be entered from a single window that displays all balance sheet accounts together on a single window and all profit and loss accounts on another. Shortcuts allow for the current year budget to be copied into next years budget so that only minor alterations have to be made, rather than spending time starting on a fresh budget screen.

Business Insights

Business Insights calculates important financial ratios, providing current information about profits, turnover, and operating balances.

Bank on AccountEdge

The banking command center lets you write and record checks, prepare bank deposits, print receipts, and reconcile your accounts. Use it to see all your important banking information at a glance, including your running balance and all transactions within a specified date range.

Track your income with 50 sales reports

AccountEdge includes 50 sales-related reports to help you analyze your businesses income. Reports are customizable, can be exported to Excel, HTML, viewed on-screen, emailed, or exported as a text file, and added to your reports menu for quick access.

Track and bill your time

Track and bill your time with the Time Billing command center, using multiple billing rates, tracking chargeable and non-chargeable time, and billing in hours, increments of hours, or units.

Manage your inventory

AccountEdge's powerful Inventory command center allows for total inventory control: multiple pricing levels, kit-building and negative inventory. Receive inventory into multiple locations, whether it's different shelves in a warehouse or different warehouses altogether. You can even keep a digital photo of each item for easy reference.

Contact management

Track important customer, employee, and vendor information and sync with Mac OS X Address Book. Keep contact information, employee details, selling details, jobs, and even add pictures. View maps and get turn-by-turn directions to meet with your customers and vendors with Google MapsTM integration.
